AMC Service Report - Italtvacuum Pump

Field	Details
Company Name	
Location / Site	
Contact Person	
Madel - Serial No. - Installation Year	
Operating Hours / Day	
Application / Process Description	

Checklist (Routine Preventive Maintenance)

SR	Description	Status
1	Check the oil level in the oil reserves.	☐ OK ☐ Topped Up
2	Check the oil level on the Root Compressors (If available).	☐ OK ☐ Topped Up ☐ NA
3	Check the lubrication circuit.	☐ Normal ☐ Leakage ☐ Blockage
4	Check the discharge valves.	☐ OK ☐ Cleaned / Replaced ☐ Spare Required
5	Check & adjust the Gland packing.	☐ OK ☐ Adjusted / Replaced ☐ Spare Required
6	Oil filter cleaning.	☐ OK ☐ Cleaned / Replaced ☐ Spare Required
7	Greasing of the pump.	☐ OK ☐ Done
8	Check the oil seal Ring.	☐ OK ☐ Replaced ☐ Spare Required
9	Check & adjustment of the driving belts.	☐ OK ☐ Replaced ☐ Spare Required

Site & Environmental Conditions

Maintain the pump installation area in a clean, dry and workable environment.
Ensure proper ventilation, lighting and access for maintenance activities.
Prevent the accumulation of dust, chemicals, solvents, vapours or waste material near the pump.
Maintain environmental cleanliness of the pump, motor and accessories at all times.

Note : Client is obliged to maintain the above points.

Detailed Issue - Observation - Impact Matrix

SR	Issue	Observation	Impact on Pump	Severity	Recommended Spares
1	Low Vacuum	Valve damage (chock up)	Overheat	Med	Valve set
		Slide valve Damaged	Abnormal Noise	High	slide valve or spring
		Piston ring Damaged	Piston or cylinder damage	High	piston ring
		Oil seal Damaged	Oil consumption Vacuum	Med	sealing set
2	Abnormal Sound	Slide valve / Slide Valve spring Damaged	Overheat, Low Vacuum	High	Slide valve / Slide Valve spring
		Shell Bearing Damaged	Mechanical Damaged	High	Shell Bearing
		Piston Pin / Bush Damaged	Mechanical Damaged	High	Piston Pin / Bush
		Flywheel / Distribution Rod Bearing Damaged	High Vibration	High	Flywheel / Distribution Rod Bearing
		Distribution Control Pin Damaged	Lubrication Pump Damage	High	Distribution Control Pin
		Pin For Outer Lever Damaged	Tie Rod Head Damage	High	Pin For Outer Lever
		Connecting Rod Damaged	Mechanical Damage	High	Connecting Rod
		Crankshaft Damaged	Mechanical Damage	High	Crank Shaft
		Inner Lever Damaged	Slide Valve Damage	High	Inner Lever
		Cross Head Damaged	Mechanical Damage	High	Cross Head

Mandatory Spares - AMC Compliance Matrix

Spare Name	Pump Model	Total To Order (Total)
Complete set of Gaskets		
Complete set of Valve Gasket		
Complete set of Valve Spring		
Complete set of Valve Screw		
Complete set of Oil Connectors		
Ferrule / Insert / Reducer set		
Nylon Tubing Set		

Commercial & Compliance Notes (AMC Aligned)

1. The above-listed spares are classified as MANDATORY / RECOMMENDED and are required to be PROCURED and MAINTAINED at the site before the next scheduled maintenance visit.
2. In case mandatory spares are not available or partially available at the site, the maintenance visit may be restricted to inspection only. It shall be counted as a PM visit under the AMC.
3. Any limitation, delay or reduced scope of maintenance arising due to non-procurement of mandatory spares shall not be attributable to the service provider.

Client Obligations

The client shall ensure the timely procurement and availability of all mandatory spares as recommended in this report to ensure uninterrupted operation and effective AMC service.

We acknowledge the above mandatory spares requirement and understand the AMC compliance conditions.
